ABDUR RAHMAN

FULL-STACK & MOBILE DEVELOPER

REACT NATIVE | NEXT.JS | SUPABASE | PYTHON

Mumbai, India
abdur.rahman@vit.edu.in
8303870726
portfolio.anrix.me

01 / PROFILE

Developer who builds secure, fast mobile apps and full-stack web products. Shipped four platforms: an alumni system for the Smart India Hackathon, a marketplace for abandoned side projects, campus digital notice boards, and an AI tool that digitizes handwritten attendance registers. B.Tech student at VIT Mumbai, open to full-time, internship, and contract roles.

02 / EXPERIENCE

Full-Stack Developer — NexaLink

SMART INDIA HACKATHON SIH25017 | VIT MUMBAI | NEXALINK.ANRIX.ME

- Built a role-based alumni platform connecting students, alumni, faculty, and admins, with mentorship matching, job and event workflows, and real-time messaging.
- Hardened the Supabase backend with Row Level Security on 17 tables, SHA-256 hash-chained audit logs, and server-side login lockout.
- Designed a responsive, accessible UI (four layout tiers, WCAG AA contrast) shared across four user roles.

Creator & Full-Stack Developer — The Graveyard

INDEPENDENT | NEXT.JS 16 · SUPABASE · RAZORPAY · FRAMER MOTION

- Built a marketplace to sell, claim, or find co-founders for abandoned side projects, with tombstone-style listings (cause of death, last commit) backed by GitHub API data.
- Created a publish wizard that inspects zip uploads in the browser, plus a project dossier with file trees, screenshot galleries, and Razorpay payments.
- Shipped a motion-forward UI with Framer Motion and Lenis, including a draggable wall of revived projects.

Full-Stack Mobile Developer — Love Connect

SELF-EMPLOYED | JAN 2025 – PRESENT | REACT NATIVE · FIREBASE · SQLITE

- Sole developer of a relationship app with 8+ feature modules, including a shared memory vault, gamified progress features, and an offline-capable journal.
- Built a hybrid Firebase + SQLite data layer with real-time sync online and local fallback offline, cutting re-fetch requests by an estimated 60%; Firestore reads under 200 ms.
- Implemented biometric authentication and a custom privacy mode, with Cloud Functions for push notifications, streak validation, and access control.

Content & Video Editor

INDEPENDENT | MAR 2019 – FEB 2026

- Edited technical and creative content for 7 years, cutting revision rounds by setting style guidelines up front.

03 / PROJECTS

V Notice — Offline-First Digital Notice Board

PYTHON · FLASK · SERVICE WORKERS · RASPBERRY PI | LIVE DEMO

- Department-wise kiosk displays that keep playing from cache when the network drops, with urgent takeover, QR links to a mobile notice page, and a backend verified under 60 MB RAM.

AttendAI — Handwritten Attendance Digitization

PYTHON · FASTAPI · STREAMLIT · GEMINI | GITHUB

- Vision pipeline that reads signatures, AB marks, and range arrows from register photos and appends reviewed sessions to a cumulative Excel sheet with automatic attendance percentages.

04 / SKILLS

LANGUAGES
JavaScript, TypeScript, Python, Java, C++

FRAMEWORKS
React Native, Next.js, React, Node.js, Flask, FastAPI, Streamlit

UI & DESIGN
Tailwind CSS, Framer Motion, Figma, Responsive Design, UI/UX

BACKEND & DATA
Supabase (PostgreSQL, RLS), Firebase, SQLite, REST APIs, Razorpay, Biometric Auth

AI & TOOLS
Gemini API (vision), Git/GitHub, Vite, Vercel, Postman, Android Studio, Raspberry Pi

05 / EDUCATION

B.Tech, Electronics & Computer Science

Vidyalankar Institute of Technology, Mumbai
2024 – 2028

06 / CERTIFICATIONS

- Programming in Java — NPTEL
- Career Edge: Young Professional — TCS iON
- MATLAB — online course certificate
